

BUILDING INFORMATION MODELLING POLICY

VINCI Construction UK Ltd is part of the VINCI SA Group, a world leader in concessions, construction, facilities and associated services. VINCI Construction UK Ltd delivers a comprehensive service from project inception through design, manufacturing and construction to operations and maintenance. The scope of this policy covers all UK operations.

The current climate within the Construction Industry makes it clearer than ever before that the effective and efficient exchange of information lies at the heart of collaborative relationships and leaner, smarter delivery of projects to our customers.

Building Information Modelling (BIM) is a collaborative way of working, underpinned by the digital technologies, which unlock more efficient methods of designing, constructing and maintaining our building and infrastructure assets.

One key competitive advantage of BIM is its ability to promote greater transparency and collaboration between our designers and our suppliers and thereby reduce waste (procurement, process and material).

The VINCI Construction UK Ltd Board and I are committed to the development and implementation of a Building Information Modelling (BIM) capability that will become an integral part of the way we and our Supply Chain deliver projects.

This commitment is aimed at achieving:

- An increased awareness and understanding of BIM across our organisation.
- The development of a first-in-class BIM capability with the commensurate skills, experience and capacity
- Improved outcomes for all project stakeholders.
- Partnering with the UK BIM Alliance – a cross industry alliance to further the implementation of BIM Level 2 across the Construction Industry, its Supply Chain and its Customers.

These aims will be underpinned by VINCI's BIM Implementation Plan on all tenders and projects, supported by a dedicated BIM Team. The plan details how our people will fully utilise and drive the use of BIM throughout the full life-cycle of our projects as we shift towards BIM Level 3 and digital transformation of the construction industry, towards 2025.

This policy will be reviewed annually and be adapted if changes to the company occur. This policy will be communicated to all staff via the intranet and copies will be posted on all our office notice boards. Furthermore, it will be made available to members of the public via the VINCI Construction UK Ltd website and on request.

Bruno Dupety
Chief Executive
VINCI Construction UK Ltd
